Acrylic & Synthetic Floor

Technical Specifications and Construction Steps

INFRASTRUCTURE WORKS

Option 1: ASPHALT FLOOR

- The concrete girder is surrounded by a (10-15) cm stabilized material or plentmix filling and compacted with a vibratory roller.
- On the compacted ground, a slope of (5-7) cm zero (0) surface asphalt is laid and rolled with a slope of 0.005% (five per thousand).

Option 2: ASPHALT FLOOR ON CONCRETE

- Leveling is done by laying 5cm (16-22mm) crushed stone 2 in the field surrounded by concrete beams.
- Leveling is done by pouring (12- 15) cm mesh steel reinforced BS 20 (C-20) ready concrete by giving a slope of 0.005% (five per thousand) on the leveled crushed stone.
- On the concrete floor (5-7) cm zero (0) asphalt surface asphalt is laid and rolled.

ACRYLIC APPLICATION WORKS

- **Preparation: Cured asphalt floor surface is cleaned and made free of dust and foreign matter.**

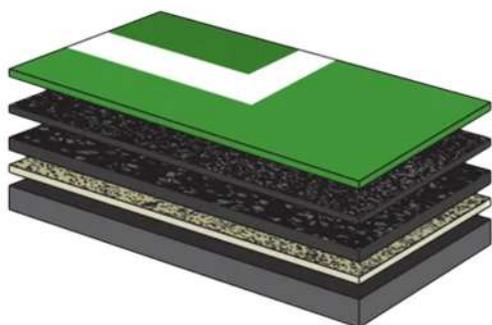

1st Layer : Primer (undercoat) is applied on the surface to increase the retention of the material to be applied.

2nd Layer : After the primer application, a Resurfacer layer is applied to cover the pores on the floor.

3rd Layer : Three layers of Cushion (Powder SBR Mixture) are then applied to the floor to form an elastic layer.

4th Layer : Two layers of Acrylic paint is applied on the created layer.

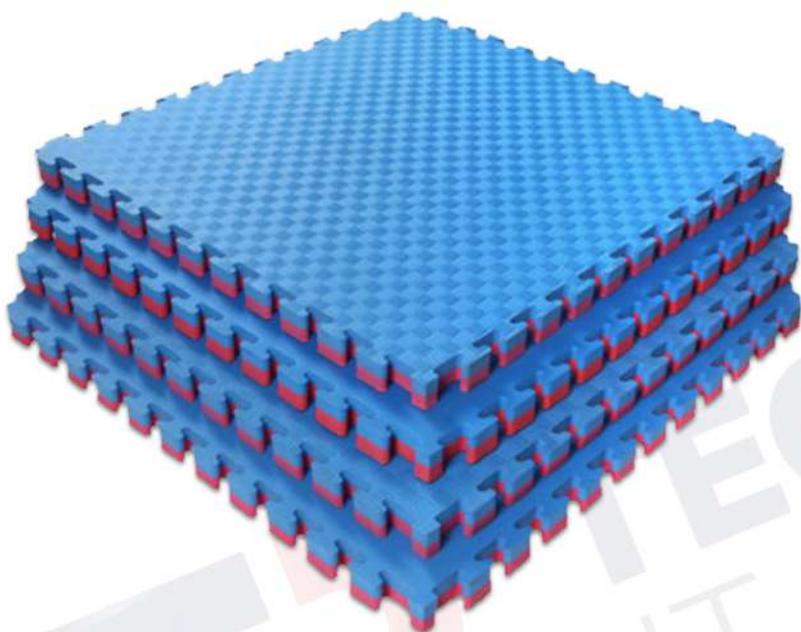

5th Layer : Game-lines are drawn on the acrylic paint is drawn in accordance with the project and the field is made ready for use.

Outdoor EPDM Flooring

Indoor EPDM Flooring

09. KIDS SAFETY FLOORING

(Outdoor / Indoor EPDM Flooring)

➤ On Site EPDM Flooring

ARCHITECTURAL

SPECIFICATION:

(Poured-in-Place) is a seamless play area surface consisting of recycled rubber tire granular combined together with polyurethane binder. Top Coat is UV-stable EPDM Rubber granules combined with polyurethane binder.

QUALITY ASSURANCE

- Installer shall have at least five (5) years proven experience in the industry and approved by product manufacturer.
- Submit 300mm x 300mm product samples in specific colour and specified thickness.
- Colors Blue, Forest Green, Red, Yellow, Brown, Purple, Emerald Green, Teal & Black.

IMPORTANT NOTICE

This is caused by the reaction urethane resin coating on the rubber granules when in contact with Ultra Violet light. This is a short term reaction until the natural effects of fading occur as the curing process proceeds
